

### GENOMIC SURVEILLANCE OF THE 2014 EBOLA OUTBREAK

Harvard scientist Pardis Sabeti will join the meeting on Thursday, October 2, 2014, to discuss her recent research findings on the Ebola virus and outbreak. Below are several articles that offer additional background and insight into Sabeti's work.

- 1. In this *New York Times* piece, Sabeti remembers her colleagues who have lost their lives to Ebola, the very disease they were fighting.**  
Pardis Sabeti, "[Studying Ebola, Then Dying From It](#)," *New York Times*, September 5, 2014.
- 2. A comprehensive look at the groundbreaking research leading the fight against the Ebola outbreak.**  
Deborah Netburn, "[The Most Complete Ebola Genome Yet: What It Can Tell Us](#)," *Los Angeles Times*, August 28, 2014.
- 3. Read how Harvard scientists are at the forefront of vital research in the fight against the Ebola outbreak.**  
Carolyn Y. Johnson, "[Harvard Lab Delves into Ebola Outbreak](#)," *Boston Globe*, August 28, 2014.
- 4. The National Institutes of Health (NIH) recognizes Sabeti's vital work studying the Ebola virus and discusses her team's groundbreaking findings.**
